

RS 03

CNC | ROBOTICS | ROBODRILL | **ROBOSHOT** | ROBOCUT

ROBOSHOT Advanced Level

UK-TRN-RS-00003-EN

DESCRIPTION

This course teaches technicians and validation engineers how to use the advanced functions available on the ROBOSHOT to enhance production.

OBJECTIVES

At the end of the course participants will be able to:

- Optimise mould & ejector protection systems
- Control barrel temperatures efficiently
- Setup minimum clamp force control
- Setup precision metering setup and usage
- Setup pre-injection function
- Understand core control system
- Understand telephone support procedures

TOPICS COVERED

- AI mould & ejector protection optimisation
- Barrel temperature control management
- Injection setup
- Minimum clamp force control
- AI pressure profile trace & AI extruder functions
- Precision metering system
- Overview of core control system
- Telephone support procedures
